

Letter No. GUB/GC/38/25/223
Date: 25 November 2025

Subject: Guidelines for Respectful Use of GUB Classrooms, Laboratories, and Common Spaces

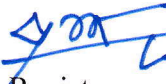

It has been observed with great concern that some students are not maintaining the expected decorum and ethical standards while using classrooms, lab rooms, and certain common spaces of the university, including the east side of the field, the 4th floor of the Admin Building, GUB bus services, and other common areas.

Several incidents of inappropriate conduct between male and female students—especially in isolated or less populated spaces—have been reported by the Proctorial Team and the University Authority. Such behaviour is not consistent with the GUB Code of Conduct, nor with our social, cultural, and religious values. These actions are unprofessional and not acceptable within the university environment.

Students are gently but firmly advised to avoid any activities that violate university rules. Please be reminded that misconduct may lead to serious disciplinary actions, including suspension or expulsion, as per university regulations.

All students should also note that **the entire GUB campus—including classrooms, lab rooms, corridors, rooftops, and common areas—is monitored through CCTV surveillance.** Activities in these spaces are observed by authorized personnel to ensure a safe and respectful campus environment.

The University appreciates the cooperation of every student in upholding a campus atmosphere that reflects integrity, mutual respect, and academic excellence.
